

SALEH EDDINE TOUIL

Cybersecurity Specialist | CPTS | Bug Bounty Hunter | Web & API Security

☎ +216 52 750 718 | @ saleh.touil@icloud.com | 🔗 LinkedIn | 🐙 GitHub | 📁 Portfolio | 📍 Soukra, Ariana, Tunisia

PROFESSIONAL SUMMARY

CPTS-certified cybersecurity specialist and ICT graduate specialized in Web and API security, access control testing, authentication logic, offensive reconnaissance, SOC investigation, and secure AI integration. Active Intigriti bug bounty hunter with 10+ valid submissions, ranked program achievements, and accepted findings across low to exceptional severity. Combines hands-on application security research with full-stack engineering experience to identify vulnerabilities, explain business impact, and deliver clear remediation guidance.

EDUCATION

Higher Institute of Technological Studies in Communications of Tunis

Tunis, Tunisia

Bachelor in Information and Communication Technologies

Sep 2021 – Jun 2026

Specialization: Cybersecurity

Graduated

GoMyCode Hackerspace

Tunis, Tunisia

Cybersecurity Training

Feb 2022 – May 2022

- Completed hands-on training in core cybersecurity concepts, practical labs, secure workflows, and applied offensive/defensive fundamentals.

PROFESSIONAL EXPERIENCE

Intigriti

Bug Bounty Hunter / Security Researcher

Jan 2026 – Present

- Research Web and API targets with a focus on access control, authentication logic, JWT weaknesses, GraphQL attack surface, recon, and exploit chaining.
- Submitted 10+ valid reports with accepted impact ranging from low to exceptional severity, including ranked program performance.
- Produced clear, reproducible vulnerability reports with evidence, risk explanation, impact narrative, and practical remediation recommendations.
- Confirmed improper access control in a Digital Flanders VDP context through YesWeHack, strengthening variant hunting and responsible disclosure workflows.

KEYSTONE Group

Tunis, Tunisia

Cybersecurity Engineer Intern – Final Year Project

Jan 2026 – Jun 2026

- Designed and developed CyberClaw, a cybersecurity governance platform for controlled offensive security engagements and mission execution.
- Implemented RBAC, launch-gate validation, mission authorization, evidence collection, audit traceability, and structured reporting workflows.
- Integrated AI-assisted automation to accelerate analyst workflows, improve report quality, and support consistent security engagement documentation.
- Aligned platform features with governance needs such as approval chains, accountability, controlled execution, and post-engagement reporting.

Megapc

Tunis, Tunisia

AI Integration & Web Security Engineer

Jul 2025 – Sep 2025

- Integrated AI-driven features into production web systems, including a chatbot, intelligent PC builder, product recommender, and automation workflows.
- Automated operational tasks using n8n and DeepSeek integrations to reduce repetitive work and improve turnaround time.
- Reviewed and hardened website and back-office components against broken authentication, exposed APIs, privilege escalation, and risky authorization paths.
- Worked across Next.js web architecture, OAuth 2.0 API gateway hardening, JWT microservice security, and internal workflow optimization.

KEYSTONE Group

Tunis, Tunisia

Cybersecurity Intern

Jan 2025 – Feb 2025

- Supported security assessments and red-team style testing across internal and client-oriented scenarios.
- Contributed to vulnerability discovery, validation, documentation, remediation alignment, and technical communication with stakeholders.

Sicuritalia Security Solutions

Remote / Italy

SOC Analyst L1 Intern – Online Internship

Jun 2024

- Completed a one-month online SOC internship with exposure to managed security operations, continuous monitoring, and incident response workflows.
- Monitored SIEM alerts and SOC ticket queues; performed L1 triage, enrichment, prioritization, false-positive reduction, and escalation.
- Analyzed logs and correlated security events to validate suspicious activity, document incident timelines, and support follow-up actions.

Petshouse.tn

Tunisia

Web Developer & Project Manager

Jan 2024 – Sep 2024

- Developed and maintained Odoo-based invoicing, e-commerce, CRM, and shop-management modules for business operations.
- Built automated invoicing features that reduced manual errors by **20%** and improved operational reliability.
- Supported SEO, targeted marketing, and social media execution, contributing to a **25%** increase in online sales.

Orange Tunisia / Orange Business Services

Tunis, Tunisia

Data Analyst Intern

Jan 2022 – Feb 2022

- Cleaned, filtered, and analyzed business data; built reporting dashboards to improve visibility into operational status.
- Improved data accuracy by **15%** through structured cleaning, validation, and status-based filtering workflows.

SELECTED PROJECTS

CyberClaw | *Cybersecurity Governance Platform*

2026

- Built a governance platform for offensive security missions with RBAC, launch gates, controlled execution, evidence tracking, audit trails, and AI-assisted reporting.

GoReconX | *OSINT & Network Reconnaissance Platform in Go*

2025

- Developed a modular reconnaissance toolkit for subdomain enumeration, header and technology analysis, directory enumeration, port scanning, service detection, and AI-assisted risk reporting.
- Built multi-format reporting exports such as JSON, HTML, PDF, and CSV with structured findings and management-friendly summaries.

LogChat | *Security Log Correlation Dashboard + LLM-assisted Analysis*

2025

- Developed an admin dashboard to ingest, visualize, and correlate multi-source logs for investigations and security operations.
- Integrated an LLM-assisted layer to summarize log streams, extract indicators, and support analyst-style Q&A over events.

Security Hardening of Back-office & Public APIs | *Web/AppSec Review*

2025

- Reviewed authentication and authorization logic, reduced risky public endpoints, and mitigated privilege escalation vectors in production-facing systems.

Snort IDS Lab | *Signature and Behavior-based Detection*

2023

- Built an IDS lab with Snort, VMs, and Docker; wrote rules for web attacks, SSH brute force, scanning behavior, and abnormal request-rate patterns.

OpenSSL PKI Mini-Lab | *Certificates, Signing, Verification, TLS Basics*

2023

- Implemented a mini PKI workflow with OpenSSL including private keys, CSRs, X.509 certificates, CA signing, chain validation, and TLS certificate handling.

BUG BOUNTY & CTF ACHIEVEMENTS

Bug Bounty: Active Intigriti researcher focused on Web/API security, access control, BOLA/IDOR, authentication logic, JWT, GraphQL, recon, exploit chaining, and impact-driven reporting. Achievements include Top 1 and Top 10 program rankings, 10+ valid submissions, and accepted findings across low, medium, high, critical, and exceptional severity.

Team no!dea: 1st Place DarkNets CTF 3.0; 1st Place Cr4ck0ut CTF 2.0; 1st Place Darkest Hour CTF; 1st Place Darkest Hour Eclipse Edition; Top 8 Securinets INSAT International Finals among 600+ teams.

Additional CTF Results: 1st Place CTF GCUP with Team Shadows v1 and Sayonara v2; 2nd Place Cybermaze CTF; 2nd Place SecuriNets TEK-UP CTF with 11 first bloods.

TECHNICAL SKILLS

Security: Web/API Security, Application Security, BOLA/IDOR, AuthN/AuthZ Review, JWT Security, GraphQL Security, Business Logic Testing, Vulnerability Assessment, Threat Modeling, SOC Triage, Log Analysis, Incident Investigation

Offensive/Recon: OSINT, Subdomain Enumeration, Port Scanning, Service Fingerprinting, Web Exploitation, CTF, Basic Reverse Engineering, Basic Cryptography

Tools: Burp Suite, Caido, OWASP ZAP, Nmap, Wireshark, Metasploit, Snort, Splunk, Volatility, Censys, Kali Linux, Docker, Git, Postman, Linux

Programming: Python, Go, JavaScript, TypeScript, Bash, PHP, C/C++, Java, SQL

Frameworks/Stacks: MERN Stack, Next.js, React, Node.js, Express, FastAPI, Odoo, Flutter, REST APIs

Cloud/DevOps/Data: Azure, Kubernetes, GitHub Actions, CI/CD, n8n, MongoDB, MySQL, PostgreSQL, SQL Server, Redis

CERTIFICATIONS

Hack The Box Certified Penetration Testing Specialist (CPTS) — Hack The Box, 2026

API Security Fundamentals '25 — APIsec University, 2025
